DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see "AMENDMENT", filed 01/31/2006, with respect to claims 1 - 12 have been fully considered. Upon further review of the claims, the examiner noted that there is a plurality of distinct inventions claimed by the applicant.

Therefore, a restriction is required.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U. S. C. 121:
 - I. Claims 1 - 10, drawn to a method for working a tube, classified in class 72, subclass 370.02.
 - II. Claims 11 - 12, drawn to an apparatus for working a tube, classified in class 72, subclass 370.13.
3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as

claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case: The apparatus as claimed can be used to practice another and materially different process, for example: can be used for any deformation of objects.

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species Are not patentably distinct, applicant should submit evidence or identify Such evidence now of record showing the inventions or species to be

Obvious variants or clearly admit on the record that this is the case. In

Either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
